Parte 1 – Print Arduino

The screenshot displays the Tinkercad web interface. On the left, a 3D model of an Arduino Uno R3 board is shown connected to a USB cable. The board's components, including the ATmega328P microcontroller, are clearly visible. On the right, the code editor is active, showing a C++ program that calculates and prints the microcontroller's frequency and the time taken to execute a loop.

```
// C++ code
//
long c;
int i, j;
long inicio, fim, tempo;

void setup()
{
  Serial.begin(9600);
}

void loop()
{
  i = 1;
  j = 3;
  inicio = micros();
  for(c = 0; c < 1000000; c = c+1)
  {
    i = i + 3;
  }
  fim = micros();
  tempo = (fim - inicio);
  Serial.print(*"tempo = ");
  Serial.println(tempo);
}
```

The Serial Monitor at the bottom right shows the output of the program, displaying the execution time in microseconds:

```
tempo = 2715296
tempo = 2715548
tempo = 2715548
tempo = 2525856
tempo = 2526108
tempo = 2526108
tempo = 2811376
```

Parte 3 – Print Código em C

The screenshot shows the Visual Studio Code editor with a C program in `main.c`. The program calculates the execution time of a loop. The Explorer sidebar on the left shows the project structure for `TESTE_C`, including `bin`, `obj`, `a.out`, `main`, `main.c`, `main.exe`, `main.o`, `rodar.sh`, `teste_c.cbp`, `teste_c.depend`, and `teste_c.layout`. The main editor displays the source code of `main.c`, which includes headers, variable declarations, and a loop that prints the time taken for a specific operation.

```
1 #include <stdio.h>
2 #include <time.h>
3
4
5 int main()
6 {
7     clock_t inicio, fim, T;
8     float Tempo, media = 0;
9     register int c;
10
11     int a, b;
12     int *i = &a;
13     int *j = &b;
14
15     *i=3;
16     *j=1;
17
18     int k, num1 = 1, num2 = 3;
19
20     T = CLOCKS_PER_SEC;
21     for (k = 1; k <= 10; k = k + 1)
22     {
23         inicio = clock();
24         for (c = 1; c <= 10000000; c = c + 1)
25         {
```

The Output window at the bottom shows the program's execution results, displaying the time taken for each iteration of the loop and the total time taken for the entire program.

```
Tempo : 5 ms
Tempo : 5 ms
Tempo : 5 ms
Tempo : 5 ms
Tempo : 5 ms
Tempo : 5 ms
Tempo : 5 ms
Tempo : 5 ms
Tempo : 5 ms
Tempo : 5 ms
5 ms
[Done] exited with code=0 in 0.084 seconds
```

The status bar at the bottom indicates the current file is `periodo5*`, the cursor is at line 26, column 32, and the encoding is UTF-8.
